

WOMEN AND THE DEVELOPMENT OF INFORMATION AND
COMMUNICATION TECHNOLOGY (ICT) IN NIGERIA:
A CASE STUDY OF TWO NIGERIAN UNIVERSITIES

by

Lenis Saweda Liverpool

A thesis submitted in partial fulfillment
of the requirements for the Master of
Arts degree in Third World Development Support
in the Graduate College of
The University of Iowa

July 2004

Thesis Supervisor: Associate Professor Douglas Midgett

Graduate College
The University of Iowa
Iowa City, Iowa

CERTIFICATE OF APPROVAL

MASTER'S THESIS

This is to certify that the Master's thesis of

Lenis Saweda Liverpool

has been approved by the Examining Committee
for the thesis requirement for the Master of Arts
degree in Third World Development Support at the
July 2004 graduation.

Thesis Committee: _____
Douglas Midgett, Thesis Supervisor

Clifford Missen

Michael McNulty

Rex Honey

To God Almighty: My strength, my life, my all

The future belongs to the countries whose people make the most productive use of information, knowledge and technology - these are now the key factors for economic success, not natural resources.-

Goh Chok Tong, 1993 (Speech by Prime minister of Singapore)
Date unknown

ACKNOWLEDGMENTS

I wish to express my heartfelt gratitude to all those who helped in improving the quality of this work and bringing it to a finish.

I would first of all like to thank God who has been my source of strength and to whom I owe all that I have been able to do and accomplish.

I would also like to thank my parents Professor and Mrs. L.S.O Liverpool for not just making my existence a reality but for the continuous love, encouragement, prayers and advice given through out the course of this research. To my brother, Dr. T.B. Liverpool and my sister, Yema Liverpool, I would like to say a big thank you for all the suggestions and moral support.

My deepest appreciation goes to my advisors, Professor Douglas Midgett, Mr. Clifford Missen, Professor Michael McNulty and Professor Rex Honey. Thanks for grooming me through the course of this research project. Your patient guidance and corrections have indeed brought this work to an acceptable standard.

My heartfelt gratitude also goes to all those who took the time to participate in and coordinate the on line surveys and to various key informants at Nigerian universities such as Prof. Kehinde, Kanmi Ade and Mr. Pam Dayyat. I would also like to appreciate the contributions of various scholars in the field of gender and information and communication technology like Vashti Galpin and Tracy camp. Thanks for your references and quick responses to various questions I had during the course of developing my thoughts and writing out this thesis.

Finally I would like to thank my friends, Sade Owolabi, Ishwari Sivagnanam, Abiodun Oluyomi, Sunday Goshit and family, Mary Ndande, Belindah Mutuku, Keith and Carol Plate, Edet Okon, Mimi and Hirut Yohannes,

Jane Kimani and Comfort Bello for their friendship, prayers and support. Thanks for proof reading my work and critiquing my thoughts. I really do appreciate your friendship, love and prayers.

Thanks so much and may God bless you all!

ABSTRACT

Over the years, there has been a consistent record of low female representation and participation in science and technology, specifically, in the area of Information and Communication Technology (ICT). This trend not only exists in African and other developing countries, but in many developed nations as well. Thus it has been a cause for concern for many and consequently the topic of numerous discussions and research.

Given the instrumental role that ICT plays in development, it is argued that if women, who constitute about half of the human population do not actively participate in this sector; nation's will be limiting the impact that ICT could have on their economy.

Being a West African female student interested in information technology and fascinated by the global trend of persistently low and in some cases decreasing female participation in the field of information technology, I have decided to probe this issue further in this research. In particular, my interests lie in the development of information technology. I hope to extend my analysis beyond the disclosure of the already conceived and established fact that women (though instrumental in development) are highly under represented in ICT. I intend to look at this phenomenon as it is revealed in the education sector in Nigeria and explore ways in which this could be addressed.

The case studies used in this research are from two universities in Nigeria - The University of Jos (UNIJOS), in Central Nigeria and The Obafemi Awolowo University (OAU) in southwest Nigeria. These two institutions were chosen for two reasons. First, because of the significant progress they have recorded in their development and use of ICT (relative to other institutions in the country) and secondly, because of the different approaches that have been

adopted by these institutions in their bid to develop their ICT systems. While UNIJOS adopted the use of an internship program as a key tool in the development of their ICT system and the spread of the ICT culture to its community, OAU has made use of systems managers from its Information Technology Unit (INTECU) and adopted network assistants from its engineering departments.

This research will attempt to identify the reasons for low female participation in the identified programs at these institutions, compare it with findings from research done in developed countries, investigate strategies that have been adopted (in developed countries as well as in other developing countries) and try to see how this could be incorporated by developing countries (Nigeria, in this case) given their own particular issues and environment. I will also suggest possible strategies that could be considered by African institutions of higher learning as they develop and improve their ICT policy and systems.

TABLE OF CONTENTS

LIST OF TABLES.....	x
LIST OF FIGURES	xi
CHAPTER ONE: INTRODUCTION.....	1
Background.....	1
Problem	2
Aim and objectives.....	4
Study area	4
Methodology	5
Significance of study.....	6
Limitations.....	7
CHAPTER TWO: THE ECONOMICS OF ICT AND EDUCATION	8
Economic development and human resource development	8
Information and communication technology (ICT) and economic growth.....	9
ICT and total factor productivity (TFP)	9
Information and communication technology and education	11
ICT and education in Africa:.....	17
ICT and higher education in Nigeria	19
The evolution of ICT in Nigerian educational institutions	19
CHAPTER THREE: WOMEN, ICT AND EDUCATION	21
Women, ICT and development: the trend over time	21
Female ICT participation in tertiary education in the USA	22
Female ICT participation in tertiary education in Europe, Asia and Africa.....	27
Female participation in ICT in education in Nigeria.....	33
CHAPTER FOUR: ANALYSIS OF FEMALE PARTICIPATION IN THE INFORMATION TECHNOLOGY FIELD AT TWO NIGERIAN UNIVERSITIES.....	37
Background.....	37
ICT at Obafemi Awolowo University (OAU)	37
Information Technology and Communication Unit (INTECU)	38
ICT at The University Of Jos (UNI JOS)	39
The internship program	40
Findings 1: female participation in traditional vs. non traditional ict development strategies	41
Discussion of findings 1	45
Findings 2: Nigerian male and female perceptions of the ICT field and female participation therein	47

CHAPTER FIVE: POLICY RECOMMENDATIONS AND CONCLUSION	50
Policy recommendations.....	50
Conclusion	59
Future directions	60
APPENDIX.....	64
BIBLIOGRAPHY	72

LIST OF TABLES

Table

1.	Scientists and engineers in research and development per million people 1997 in selected countries	17
2.	Gender composition in various IT occupations	24
3.	Gender disaggregated computer science enrollment figures at Carnegie Mellon University, USA (1994-2003)	27
4.	Female participation in ICT related courses in Europe	28
5.	Female participation in ICT related courses in Asia.....	29
6.	Female participation in ICT related courses in Africa.....	31
7.	ICT enrollment rates at The United States International University, Nairobi	32
8.	Gender disaggregated ICT enrollment figures for selected Nigerian universities.....	35
9.	Gender disaggregated faculty figures for ICT related courses offered at various African universities	36
10.	Gender distribution of INTECU staff	39
11.	Gender disaggregated application and enrollment figures for various diploma courses in computer science offered at the University of Jos, Nigeria	42
12.	Gender disaggregated enrollment figures for the BSc. computer science program at the University of Jos	42
13.	Gender disaggregated enrollment figures for the BSc. computer science program at the Obafemi Awolowo University, Ife, Nigeria.....	42
