- **Safe.** No spam, viruses, pornography, etc.
- **Antivirus.** One-year license.

The eGranary Digital Library Personal Edition

The most convenient version; great for people on the move or for a single computer workstation with little or no Internet connectivity. This plug-and-play device easily connects to any Windows computer with a USB port, providing a single workstation instant access to millions of digital documents. Includes one-year antivirus.

COST: \$1,800 plus shipping

The eGranary Digital Library Appliance Server

This powerful plug-and-play server fits into any wired and/or wireless local area network and provides instant access to millions of digital documents – including video and multimedia. It can be shared by thousands of users using any Web browser. Easy installation. Reliable and fast platform for building and delivering any curriculum. Runs on Microsoft Windows or Linux Server Operating Systems. Includes one-year antivirus license for server and two clients.

COST: \$3,500 plus shipping for server, OS and configuration. Training and on-site installation options available.

The eGranary Digital Library Computer Lab

The most cost-effective way to deploy the eGranary Digital Library at institutions with few computers and little or no Internet connectivity. The Lab provides multiple workstations with instant access to millions of digital documents. This library package includes hardware, software, training, technical support, and OS system upgrades.

EACH LAB INCLUDES:

- The eGranary Digital Library - millions of educational resources on a 4TB hard drive
- 12 refurbished Pentium 4 workstations with workstation software (Windows XP and Microsoft Office or Ubuntu and Star Office)
- Two weeks of on-site training covers installation, use and maintenance and will be customized to address the particular needs of technicians, librarians, end-users, trainers, and administrators
- A new Intel Dual Core eGranary Appliance Server with 4 GB RAM and 500 GB OS hard disk
- Two year license for anti-virus
- Email/Web/phone-based technical support
- Shipping and handling costs are dependent on the organization's ability to clear the materials through customs.
- On-site set-up and installation by WiderNet staff
- Networking equipment, wires and spare parts

COST: \$30,000 for a single institution • \$13,000 per lab in quantities of ten or more (Shipping multiple labs to a single destination and combining the training sessions saves all parties considerable costs. These estimates assume shipping and importation costs which may differ from country to country. Please contact us for a firm price quote.)
